

Where the Conversion Leaks Are

domesticdomestic.com · CRO Recommendations · August 2026

The most valuable conversion mechanism on this site is the add-to-cart and checkout flow, but it is bleeding value through conflicting cart feedback after adding an item, which undermines shopper confidence at the critical moment of purchase intent.

#	Finding	Severity	Effort	PXL
1	Heavy third-party script load The homepage loads 56 scripts, which is the usual root cause of slow interaction readiness on mobile.	High	Medium	5/10
2	Homepage next step is ambiguous The homepage presents multiple unrelated CTAs and social follow headings, leaving no clear primary direction...	Medium	Low	5/10
3	Clarify culturally charged tagline The tagline is followed by a sale banner and category list, but lacks plain-language explanation of the...	Medium	Medium	5/10
4	Ambiguous Accoutrement nav label The brand tagline 'Culturally Charged Accoutrement' runs into the category list, and a separate...	Medium	Low	5/10
5	Weak page metadata Search and social previews are degraded: page title (absent), meta description are missing or outside...	Medium	Medium	5/10
6	Conflicting cart feedback after add The cart drawer simultaneously shows 'Item added' and 'View my cart (0)', confusing shoppers about whether...	Urgent	Medium	4/10
7	Sale promo competes with checkout The sitewide sale banner on the cart page offers an exit from the purchase path at the final step before...	Urgent	Medium	4/10
8	Gift card prices ambiguous Gift card amounts render without decimal separators, leaving the actual price unclear and potentially...	High	Medium	4/10
9	Account creation precedes checkout Create account is promoted ahead of Check out in the cart area, adding a non-purchase step to the primary...	Medium	Medium	4/10

#	Finding	Severity	Effort	PXL
10	Order change page pushes checkout The page meant for changing an order offers checkout as the visible action, forcing users to find another...	Medium	Medium	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
